

“Veggie Print of Joy!”

**Dip the veggies, press them right,
Colors bloom so big and bright.
Prints of shapes in every hue,
Art with veggies felt so new!**

Our Jr. KG learners explored creativity through a vegetables printing activity. Using lady's finger, brinjal, capsicum, and other veggies, the little artists dipped them in bright colors and pressed them on paper to make beautiful patterns. The activity was a fun blend of art and learning, where children discovered new textures and enjoyed turning simple vegetables into magical prints.
