

Tiny Triangles with Sticks!

Three little sticks we
placed just right,
Made a triangle, what
a sight!
Pointy corners, sides
so neat,
Learning shapes was
such a treat!

Our little learners joyfully created triangle shapes using colorful popsicle sticks. They carefully arranged the sticks and discovered how three sides come together to form a triangle.

The activity not only sparked their creativity but also helped them recognize and understand the shape in a fun and hands-on way.
