

## “A Geographical Study of Cotton’s Transformation”

The Grade 7 students brought Geography to life by building a dynamic, hands-on model of the cotton textile manufacturing process—blending research and creativity into a vibrant, collaborative project.

**A model of  
cotton's journey,  
a step closer to  
real-world  
learning.**

**Tracing fibre to fabric, the students stepped into learning with clarity and creativity.**

Showcasing the elegance of applied Geography through a refined, artful exploration of the fibre-to-fabric journey.
